This outstanding year forced all of us to slide into new spheres, experience changes and new dimensions of our existence. Daniela La Luz took the chance to write more music aside the dancefloor and got deeper into meditation.

As result of this, she gathered international talented and befriended electronic producers and pianist Natyra Elezi to bring this VA Compilation to life, which’s musical purpose is to ease the mood and open up a portal through which you can go on a journey, encourage and strengthen yourself and stimulate yourself to turn inwards.

Festivals, clubs and events are down, which is sad and dramatic for many of us and still life goes on and the term „success“ has reached another definition. Music is still essential for most of us and even if it doesn’t feel like it, we’re still moving forward.

„COPING MECHANISMS (Electronic Meditation)“ is music for the evolutionary development, which is taking place inside of you. The purpose of this compilations music is to ease the mood and open up a portal through which you can go on a journey, encourage and strengthen yourself and stimulate yourself to turn inwards.

Transform yourself and enjoy the DIMENSION OF BEING HUMAN!

From 2008-2018 Daniela La Luz was part of „Parallel Berlin“, not only as international touring live act, but also as producer, promoter, A&R and label head. In 2020 she founded her own project „DIMENSION OF BEING HUMAN“, which is a music and art project, exploring and featuring the global diversity of electronic and non-electronic music, ranging from all human feelings, to science and mysticism, connecting all countries of our beautiful planet.

DOBH will feature more releases, podcasts, art, mixes and events, during and after Corona.
